matt perfection ▶

Dulux Wash & Wear Matt combines the latest formula with 101 barrier technology to create a tough acrylic finish that doesn't highlight surface imperfections. Dulux says it's the large and small pigment particles within the new formula of Wash & Wear Matt that form a barrier to protect against oil and water-based stains, common marks, and scuffs. Traditionally, high sheen products highlight surface imperfections, but with the lower sheen of this product, professional painters can now touch-up easily. Suitable for medium traffic areas where a subtle sheen is desired, Dulux Wash & Wear Matt can be purchased from Dulux trade outlets nationwide.

◀ shutter elite

Launched into the Australian market for the first time, and distributed exclusively by The Window Outfitters, is a range of three new beautifully designed, state-of-the-art shutters.

The Weatherwell Elite – a strong aluminium shutter designed locally to cope with Queensland's wildest weather – has no visible screw fittings or tilt rods, a minimalist look, and is easy to install.

The Highprofile Elite, a classic timber shutter, is made from premium American hardwood and was engineered to cover huge areas without blocking the view.

The third shutter is the Openview Elite. With a unique framing system, the Openview has the aesthetic appeal of a timber shutter with the flexibility of a blind.

Gorilla tough ▶

Evo Building Products has just introduced its latest product – high quality Gorilla Brooms. Made from triangular steel and overlaid with rubber grips, Evo says the broom handle is light, strong and comfortable. Like the handle, the Gorilla Broom's head is also light and strong as it is made from high density polypropylene, and won't soak up water like traditional wooden heads.

For greater sweeping performance, the bristles are made from high quality polyethylene terephthalate (PET) for supreme durability, and are longer than most outdoor brooms. And making Gorilla Brooms even more unique is its scraper blade – perfect for shifting stuck-on grime, cement and plaster spots.
